

Introducing the world's first desktop, gasless, cabinless device for lung volume measurements, as well as spirometry and diffusion testing, in any clinical setting.

Easy to use, MiniBox+ provides accurate and repeatable, fully automatic measurements of Total Lung Capacity (TLC) and Residual Volume (RV), as well as single breath CO Diffusion (DLCO). With less than 2 minutes of tidal breathing required for Lung Volume Measurements (LVM), this gasless, cabinless system provides maximum patient comfort.

### MiniBox+ Cart

**EMR COMPATIBLE**

**EASY**

Easy to operate with minimum set-up. Fully automatic LVM and DLCO measurements. All results automatically generated.

**ACCURATE**

Clinically validated in over 500 patients at 8 medical centers, based on comparative data from leading body plethysmography devices.

**DESKTOP**

With this desktop, affordable device you can make complete Pulmonary Function Testing (PFT) more accessible to patients while expanding your medical practice.

MiniBox+™ is a patented, first-of-its-kind, desktop device for complete Pulmonary Function Testing (PFT) in the point of care setting. In addition to being gasless and cabinless, accurate Lung Volume Measurements (LVM) can be taken with less than 2 minutes of tidal breathing.

## Fully Compliant with ATS/ERS Guidelines

### Spirometry

Complete set of 30+ parameters including FEV1, FVC, SVC, MVV

### Lung Volumes

Same volumes as body plethysmography including TLC, FRC, RV

### Diffusing Capacity

DLCO, VA, DLCO/VA

### Fully Automatic LVM and DLCO

Easy to operate by anyone on your medical office staff

### Accurate & Repeatable

Automatically generated results minimize technician bias

### Full Selection of Predicted Equations

Based on wide range of ethnicities

### Pediatric Use

Children from age 4 can be measured

### Multi-Language Capabilities

For multi-cultural locations  
**Single Breath Method (DLCO)**

The gold standard for Diffusion Testing

### Worldwide Technical Support

Including easy software upgrades

### Minimal Downtime

Replacement device provided promptly

### ROI Within Months

With measurement of only 2 to 5 patients daily

### Portability

Move from locations to location in a rolling case (optional)

### MiniBox+ economics in your office practice

No. measurements/day	Potential reimbursement/month	ROI	FLEXIBLE FINANCING PLANS ARE AVAILABLE  Ranging from \$340 to \$570 monthly payments over 3 to 5 years, with an option of starting payment 3 months post-purchase.
	<b>\$17,000</b> 5 Patients Per Day	<b>1.7</b> Months	
	<b>\$13,600</b> 4 Patients Per Day	<b>2.1</b> Months	
	<b>\$10,200</b> 3 Patients Per Day	<b>2.9</b> Months	
	<b>\$6,800</b> 2 Patients Per Day	<b>4.3</b> Months	
	<b>\$3,400</b> 1 Patient Per Day	<b>8.7</b> Months

CPT Codes for MiniBox+ Test Measurements (USA)

94010 Forced vital capacity – breathing capacity test

94060 Pre vs. Post bronchodilator – breathing capacity test

94729 Diffusing Capacity

94200 Maximum breathing capacity

94726 Total lung capacity – determination of lung volume/plethysmography
