

# CLINIC-IN-A-BAG Any Patient - Any Time - Any Place

**CLINIC IN A BAG** is a comprehensive cloud based examination platform clinicians can wirelessly deploy to assess patients at any point of care.

**Patient to Patient  
Ward to Ward- City to City**  
CLINIC IN A BAG is a comprehensive examination whenever and wherever clinicians need it.

**Great for in-office use, home visits, nursing homes, doctors-on-the-go, and remote patient monitoring. Offers solutions for CHF & COPD. Dramatically reduces readmissions.**

## The Future of Telemedicine

Clinic in a Bag streamlines diagnosis at an affordable cost by deploying heart, lung, cardiovascular, vital signs, imaging and lab clinical assessments for any physical examination.

## Telemedicine Focused on the Clinician. The Bottom Line- Saved Lives Time and Costs.

The health examination should not be replaced by technology, but assisted with technology. The Clinic in a Bag is a connected device solution for clinician administered, digital assessments. This saves lives, time and costs for each and every encounter.

## Multimodal.

The Clinic in a Bag connected clinical device platform can be deployed at any point of care.

Clinic in a Bag is immensely useful in multiple specialties, points of care and units. Clinic in a Bag goes beyond vitals, by connecting diagnostics: CardioSleeve, Spirometer and Ultrasound - to enhance emergency, primary, specialty and ambulatory assessments. The result is a comprehensive and precise physical examination to be shared in real time amongst the care team.

Clinic in a Bag combines vitals, cutting edge diagnostic devices, lab work and HD telemedicine with the power of cloud analysis and EHR reporting to create a new level of accessible examination... A clinic without walls, with essential devices to examine a patient anywhere : **HEART:** Auscultation, 3 Lead EKG, Heart Failure Analysis (SPI) **LUNG:** Spirometry, Lung Function **VITALS:** Pulse Oximetry, Blood Pressure, Temperature, Digital Weight, Heart Rate, Breathing Rate **IMAGING:** Vascular Ultrasound, Thoracic Ultrasound, Abdominal Ultrasound (not available in the US) **LAB WORK:** Cholesterol Lipid Panel, Blood Glucose, Urinalysis **TELEMEDICINE:** Remote Consultation, HD Photo Visual Exam, Video Encounter, Cloud EMR Reports

## Product description Clinic In A Bag, includes –

- a. Rijuven Case
- b. CardioSleeve w/charger
- c. Stethoscope
- d. Pulse Oximeter
- e. Weight Scale
- f. Infrared Thermometer
- g. Peak Flow Meter
- h. Blood Pressure Meter
- i. PTS Diagnostics CardioChek+ (Lipid Panel; Glucose)
- j. Starter set of Urinalysis strips
- k. Starter set of cups for collecting urine
- l. Starter set of test strips for glucose and lipid panel (PTS Diagnostics)
- m. Starter set of disposable turbines for peak flow meter
- n. Starter set of alcohol wipes
- o. Starter set of examination gloves (rubber / latex gloves)
- p. Sharps container
- q. Starter set of Band-Aids or similar (for covering pin-prick from blood collection)
- r. Starter set of disposable lancets
- s. Starter set of capillary tubes / pipettes (for transferring blood)
- t. Starter set of cups for collecting urine

properly. The RIJUVEN App allows for off-line data capture, but must be connected to the Cloud via a cellular or wi-fi data connection in order to generate a report. Clinic In A Bag Subscription (1-year)

Additional products can be added as add-ons to the Clinic In A Bag. A partial list of such add-on devices are given below:

- Apple IOS device
- Hand Held Ultrasound
- Otoscope
- 12 Lead ECG
- Spirometer
