

Smartheart pro enables to perform a full hospital-grade ECG (12 lead) with your smartphone or iPad.

A Global ECG Platform

Small and easy to use 12 lead ECG device
Cloud based - ECGs are available anywhere anytime
24/7 professional Interpretation center

Great for in-office use, home visits, nursing homes, doctors-on-the-go, and remote patient monitoring. Offers solutions for CHF & COPD. Dramatically reduces readmissions.

Hospital Grade ECG

- Clinical 12 lead ECG
- Simultaneous sampling of the leads
- Pacemaker detection
- Data is forwarded "on-line" to the cloud
- Robust, error checking Bluetooth protocol
- Based on 20 years of experience
- Easy to position the electrodes
- Repeatable positioning of the chest electrodes
- Reusable electrodes - no need for disposables
- Firmware can be updated remotely and seamlessly during regular use.

Smartheart App

- Friendly and intuitive design
- Visual and vocal guidance
- Electrode positioning
- View historical ECG files
- Forwards the data to the servers
- No data is saved on the Smartphone
- Available for iOS & Android
- Multi Lingual

ECG Records Management

- ECG records are saved in the cloud
- Records are unchangeable once save in the repository
- Reports are available according authorizations
- Display, compare & download are available through a WEB portal
- Link to reports can be automatically received by Email
- Reports can be forwarded via the app to others for review
- Access logs and audit trails are maintained.

24/7 Professional Interpretation Center

- SHL professional team has reviewed over 5,000,000 ECGs to date
- Staffed by nurses and physicians
- Immediate Interpretation
- Interpretation is done assisted by dedicated software and guiding protocols
- All results saved are in the cloud
- A push notification is sent when interpretation is available.

- Carry out a fast, accurate ECG test in 30 seconds
- Receive a continuous indication regarding the electrodes connectivity and the ECG process
- Preview the ECG to ensure technical quality of the ECG
- Ability to distribute ECG report as needed in a secured way
- Quick and easy process for adding new patients to your Smartheart Pro account
- Comfortably and securely access, view and extract data in seconds, at any time
- Review patients' previous ECGs, for comparison
- Have the option of receiving full ECG report with findings 24-hours a day, from the professional and experienced team at the SHL Telemedicine Center
- Receive the ECG report on your smartphone, available for immediate review and saved to your Smartheart Pro account
- Include information on symptoms reported by the patient
